The seminar is in the T building which has direct access from Garfield Road. If students enter the front of the building from Route 306 they need to go to the back (opposite) side of the college following signage.

Roadway work associated with the Health Tech Building project will close off two way traffic around the campus, for a period of approximately one week.

All traffic will be routed via South Clocktower. (see below). Drivers can still access the West Lot, but will not be able to go to any other lots from there. Message boards / signage will be put up, and concrete barriers placed in the area of the work. The road should be returned to previous traffic patterns by 22 May.
